THE CHILDREN'S CLINIC, Serving Children and Their Families
67 YEARS OF SERVICE TO THE GREATER LONG BEACH AREA

Visit our website at: www.thechildrensclinic.org

The Children’s Clinic, Serving Children and Their Families (TCC) is supported by patient revenue, government funding, private grants, individual donations and special events. For 67 years, the seven yacht clubs of the Greater Long Beach Harbor area have hosted the Annual Charity Regatta—a very important fund-raising event that strongly supports the mission of the Children’s Clinic.

The Children’s Clinic is an independent not-for-profit (501)(c)(3) system of licensed community health clinics dedicated to providing quality, family, care, health education, health promotion and disease prevention in a culturally sensitive and linguistically appropriate manner to medically underserved children and their families. The Children’s Clinic was established in 1939 to provide medical services for children in need. The importance of access to health care for all children, particularly those who are low-income and therefore at greater risk for health problems, became evident.

Sixty-seven years ago, The Children’s Clinic began to deliver its services in both health care delivery and prevention to the greater Long Beach community. Eight years ago, The Children’s Clinic expanded its services to provide health care to adolescents and adults.

The Children’s Clinic has expanded from one Clinic in a section of six Clinics which include: the main Clinic, The Vasek Polak Children’s Clinic Family Health Center, The Children’s Clinic Family Health Center at Great Chartes Elementary School, The Children’s Clinic at Alondra School, The Children’s Clinic at California Elementary School and The Children’s Clinic at Alondra School. The Children’s Clinic provides comprehensive health services which include medical care and health education and promotion, laboratory testing, prescribed medications and education and promotion. As new telephones and computers allow access to vital patient data, the Children’s Clinic is able to provide more efficient care. The Children’s Clinic is committed to improving the quality of care at all the clinics and creating a medical home for all children and adults who are in need.

The Children’s Clinic’s mission is “to partner with parents and the community to provide quality health care services, health education and promotion to medically underserved children and families.”

The Children’s Clinic goals are:
• To provide direct medical services in a culturally sensitive and linguistically appropriate manner for children and families in Southern California
• To respond to the community-identified health needs of children and families
• Partner with parents, patients and the community to develop and provide health education and promotion
• To educate and advocate for health care needs of children and families
• To educate health professionals-in-training in the medical care of children and families in a diverse community
• To create a medical home for children and adults with special health care needs and chronic diseases
• To decrease health disparities as delineated in Healthy People 2010
